B.Tech, Electronics and Communication Engineering
Address : Plot no 22,12 th cross,Krishna nagar,hosur

Education

SRM IST-Kattankulathur	2027
B.Tech · Electronics and Communication Engineering	CGPA - 8.47/10
Sri Vijay vidhalaya	2023
Class XII - State board · Hosur	Percentage - 85%
Sri Vijay vidhalaya	2021
Class X - TAMIL NADU BOARD OF SECONDARY EDUCATION · Hosur	Percentage - 0%

Experience

TITAN	Dec 2025 - Dec 2025
Intern	
Assisted in technical and operational tasks, observing manufacturing/engineering workflows and quality control processes. Learned practical applications of engineering concepts, workplace safety, and industry standards while collaborating with professionals in a corporate setting.	

Projects

VisionAI – Real-Time Object Detection Application	Oct 2025 - Oct 2025
	AI and ML
Developed a real-time object detection web and Android application using TensorFlow.js with COCO-SSD and MobileNet models.	
Implemented live webcam detection and image upload functionality with bounding box visualization.	
Built a responsive React-based UI with detection history tracking and packaged the app using Capacitor and Android Studio.	
Dual-Mode Bluetooth Controlled Robotic Car	Nov 2025 - Nov 2025
	Robotics and embedded system
Designed and implemented a dual-mode robotic car using Arduino UNO with Bluetooth-based manual and voice control via Android applications.	
Integrated HC-05 Bluetooth module and L298N motor driver to control four DC motors for real-time directional movement.	
Developed a low-cost embedded system enabling hands-free voice commands and button control for educational and automation use cases.	
Plant Turgor / Stress Monitor Using Pressure Sensing	Nov 2025 - Nov 2025
	IOT and embedded system
Designed a low-cost smart sensing system to detect early plant water stress by monitoring leaf turgor pressure using a Force Sensitive Resistor (FSR).	
Implemented Arduino UNO–based signal processing to compare real-time sensor data with a calibrated healthy turgor baseline and display status on a 16x2 I2C LCD.	
Demonstrated a non-destructive and proactive precision agriculture solution for early stress detection and efficient water management.	
Adaptive Fingerprint Battery Management System	Mar 2026 - Apr 2026
· Arduino, C/C++, Fingerprint Sensor, BMS	Embedded Systems
Developed an Adaptive Fingerprint Battery Management System that integrates biometric authentication with battery monitoring to enhance security and safety. The system authorizes users through fingerprint verification, monitors key battery parameters such as voltage, current, and temperature, and provides protection against abnormal operating conditions to improve battery performance and lifespan.	

Competitions

HACKATHON

Sep 2025

Top 8 · IEEE society on social implication of technology SRMIST

Participated in Hackcelr8, a national-level hackathon organized by IEEE SSIT SRMIST, developing a socially impactful technology solution and securing a position among the Top 21 teams nationwide.

Conferences and Workshops

Drone Workshop

Mar 2025

Department of Mechanical engineering,SRMIST · SRMIST

SRM University, March 2025 Participated in a hands-on workshop focused on drone assembly, flight control, and real-world applications in surveillance and delivery systems

Arduino Workshop

Sep 2024

· IIT MADRAS RESEARCH PARK

February 2025 Gained practical skills in writing Arduino code, working with LEDs, sensors, and motors for embedded system applications.

Skills

Programming Languages: Python , C++ , CSS, HTML, Java script , SQL

Languages and Frameworks: Web design, Responsive Web design

Tools and Technologies: ARDUINO IDE, EASYEDA, Automation anywhere 360, Microsoft Excel, Power Bi, Tableau

Technical Skills: RPA, Process automation

Areas of Interest: RPA, Data analytics

Languages

English [Professional Working Proficiency], Tamil [Native Proficiency], Marathi [Native Proficiency], Telugu [Fundamental Proficiency], Hindi [Fundamental Proficiency]
